

Citizens' Health Care Working Group

HEALTH CARE THAT WORKS FOR ALL AMERICANS

You are invited to become a part of an historic discussion taking place right now across America – where citizens like you get to tell the policymakers in Washington what you like and don't like about our nation's health care system, regarding care and family support during the frailty of age, advanced illness, dying and grief.

Come and participate in a guided discussion led by Dr. Ira Byock. Tell the President and Congress exactly how you define a "healthy last chapter of life" for you, your family, and your community. How do you want to live, be cared for, and what types of support do you want your family and friends to have as they care for you?

And your voice does matter. Your opinions will help form a citizens' action plan that the President and Congress are required by law to consider as they work to make health care work for all Americans.

**This is a discussion that can't happen
without you. Your voice does matter.**

**The meeting is FREE and open to the public.
Register now to participate in the New
Hampshire meeting!**
